WHAT IS DocuTrail?

DocuTrail is our electronic document management software.

With DocuTrail, you can manage, track & store both your paper and digital documents, while reducing your company's carbon footprint.

DocuTrail lets you quickly & easily search for and edit important client or consumer-based documents.

DocuTrail allows for history tracking, by maintaining a record of your document's previous versions that were created and modified by other users.

DocuTrail is one of several stand-alone software platforms offered by Hawes Technologies. It's also included in our newest accounts receivable product solution: *ARTrail*.

FEATURES & BENEFITS

DOCUTRAIL CAN:

- Upload, download, and preview all documents
- Merge multiple images into a single document
- Reads and transforms any file formats both in source or destination
- Split single documents into multiple documents
- Crop, redact, add comments to, and highlight selective area any image
- Store the document or image with your selected reference key
